

REMARKS

The Examiner is ~~thanked~~ for his detailed and thorough action.

The Examiner objected to the drawings because the longer bolt and short bolt connected together to form the pivot means is not clearly shown on the drawings. New Fig.12 clearly shows the pivot means (two bolts connected together). Support for new Fig.12 is found in the specification at page 13, last paragraph and at page 14, first two paragraphs; and in Figs.4,10 and 11.

The Examiner objected to Fig.3 of the drawings because "20" should be —21—. The attached replacement sheet shows 20 changed to 21 on Fig.3.

The drawings were further objected to because element 53 is not described in the specification. A paragraph has been inserted into the specification describing new Fig.12 and includes a description of mounting screw 53 shown on the new figure.

Claims 3 and 10 were objected to because of informalities. The new claims are free from such informalities (see new claim 30).

Claims 7,8,18,19,23 and 24 were rejected under 35 USC 112; claims 1-4, 10-13 and 17 were rejected under 35 USC 102; and Claims 5,6,9,14-16 and 20-22 were rejected under 35 USC 103. These claims have been cancelled.

New independent claims 25, 36 and 41 correspond to original claims 7,18 and 23, incorporate claim language suggested by the Examiner and were indicated to be allowable.

Upon approval of the new drawing sheet (Fig.12) and the replacement drawing sheet; and upon the issuance of a formal notice of allowance, applicants will order the preparation of formal drawings.

All the objections and rejections have been addressed and overcome; and hence it is respectfully urged that this application is in condition for allowance.

Respectfully submitted;

A handwritten signature in black ink, appearing to read "Frank A. Spear". The signature is fluid and cursive, with the first name "Frank" being the most prominent.

Frank A. Spear
